CTL series distributed remote I/O

New product launch

New release! CTL series distributed remote I/O

Product overview

The distributed remote IO system consists of a network adapter module (CTL ECT/CTL PN) and an extended I/O module (DIT/DQT).COTRUST CTL series network adapter module is responsible for fieldbus communication(EtherCAT/Profinet)。 And realize the communication connection with the master station controller or the host computer software； Network adapters and extended I/O modules can be freely combined according to field requirements. In practical application, The preferred use of distributed I/O modules can reduce the cost, in the case of more bit requirements.

CTL ECT

CTL PN

CTL DIT/DQT/DQR

CTL series network adapter module

CTL ECT
CTL series EtherCAT slave module

Up to expandable:
16 CTL series I/O modules
realize EtherCAT fieldbus
communication

CTL PN
CTL series Profinet slave module

Up to expandable:
16 CTL series I/O modules
realize Profinet fieldbus
communication

CTL series extended I/O modules

CTL DQT16
CTL series digital output module
16-bit transistor drain output
24VDC, 0.5A

CTL DQR16
CTL series digital output module
16-bit relay output
24VDC, 2A

CTL DIT16
CTL series digital input module
16-bit input, 24VDC

The advantages of CTL series network adapter

CTL ECT / CTL PN

EtherCAT

Profinet

Flexible

More flexible communication connections

To realize the communication connection with the master station controller or the upper computer software ,

Free

Free to combine, match at will

Network adapters and extended I/O modules can be freely combined according to field requirements,

Economical

Reduce costs and increase efficiency

It is preferable to use distributed I/O modules to reduce costs when there are many bits requirements,

Strong expansion ability

1 network adapter module (CTL ECT/CTL PN) can be connected to 16 extended I/O modules (DIT/DQT/DQR)

Small footprint

High speed

Pluggable terminal

Quick connection

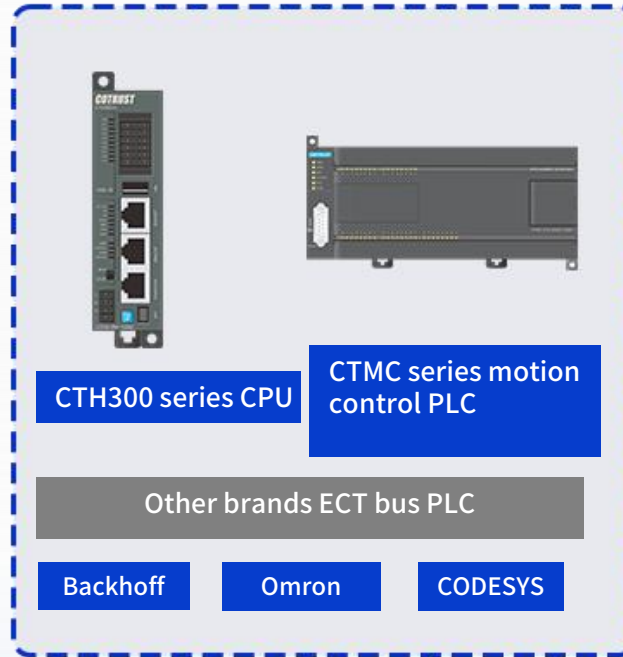

Strong communication capability of distributed remote I/O

Easy to expand

economical

EtherCAT

PROFINET

CTL series distributed remote I/O
